

Palmia Villas II

J. M. Peters Comapny

Mission Viejo, CA

1,213 - 2,283 sq. ft. plans

The Villas were added as an infill project in an existing, gate-guarded, private community for active adults. Innovative and flexible floor plans are found in three single-story and two two-story plans, each with an attached two car garage. The homes feature up to 3 bedrooms with 3 ½ baths, with master bedrooms downstairs, and several include dens as well as secondary master suites upstairs in the two-story plans. The houses are arranged around motor courtyards which provide a highly desirable level of privacy. This distinctive neighborhood offers a maintenance-free lifestyle with a variety of opportunities for outdoor activities.
