

Promenade at Porter Ranch - The Arbors

S & S Construction Company

Northridge, California

1,516 - 1,812 sq. ft. plans

Porter Ranch is an exclusive collection of gated neighborhoods, featuring a wide range of both private and public recreation facilities, as well as its own Town Center. The Arbors are paired single-family attached homes with garages rear that are plotted on efficient double-loaded alley blocks. Three two-story plans feature front porches, private central courtyards, spacious living areas with up to 3 bedrooms or optional den, master suites with large walk-in closets, gourmet kitchens, laundry rooms, and attached two-car garages. The architectural scale and character, lively mix of housing types, and the traffic calming concepts create an interesting, interconnected, pedestrian and bicycle-friendly community that minimizes the impact of garages.
